[Install Office 365 Mac](#)

The screenshot shows the Office 365 portal in a browser window. The address bar displays <https://portal.office.com/Home>. The page features a navigation bar with the Office 365 logo and a user profile icon. A large red banner on the left says "Hi, Test." The main content area is titled "Install Office on your PC" and includes icons for Word, Excel, PowerPoint, Outlook, and OneNote. Below these icons, it says "Got a Mac? Sign in to Office 365 on your Mac to install." and provides a link to "Get Office on your devices" and "Learn how to set up email and Office 365 apps on your device". There is an "Install now" button and a "Troubleshoot installation" link. On the right, there are settings for language (English) and search engine preferences (Make Bing your search engine, Make MSN your browser homepage). Below this, there is a section titled "Collaborate with Office Online" with icons for Mail, Calendar, People, OneDrive, Sites, Tasks, and Delve, as well as icons for Word Online, Excel Online, PowerPoint Online, and OneNote Online. A sidebar on the left offers to "Save your files online for easy access" with 1 TB of free storage.

However, India is not listed in the dropdown menu for regions on this link- Could I be mistaken or is this service really not available for institutions in India? It is important that I have this information to be able to approach my institution for acquiring a license or requesting Microsoft to make the same available for Indian institutions.. 'It has come to my attention that a fellow student has been able to install offline versions of office applications by signing up for free with her institution email id on her windows PC.. Trying to install Office products to my iMac Whenever I go to 'Install desktop applications' it just gives me a box that says I can only install OneDrive on a PC.. What am I doing wrong? It literally gives me no options, just tells me that OneDrive can only be installed on a PC.. But I am not able to do the same on my Mac As per online chat with a Microsoft associate, I need to check with my institution for admin rights (which appear to not be required for PC users) I am planning to request my institution (in India) to enrol with the licensing program, in case they are not already (I need to find out).

Hello Gordon I am new here as well Like Rey, I have signed up for free office 365 for educators and students and am facing the same error message ' OneDrive can only be installed on a PC.. I've looked up Youtube videos and help sites on what's going wrong, and they all seem to have more options here than allow them to just download the Mac versions. Use Office 365 Pro Plus for free on up to five desktop computers (Mac or Windows).. However, if you were to install and run Windows on your Mac in a partition, you could then use Office 365 on a Mac.. Office 365 is tied to the desktop version of Microsoft Visio which isn't available for Mac.. I tried this workaround though and found it was very laggy and made using the Mac very slow at times. 34bbb28f04 [Blackboard Collaborate Launcher Mac Download](#)
